

Summary

Product Leader experienced in shipping AI & automation products that drive measurable outcomes. Expert at 0→1 startup builds and enterprise platforms, specializing in transforming ambiguous operational challenges into high-adoption products.

Experience

Vorto.ai - AI-driven Supply Chain Platform

Denver, CO

Product Manager (Leadership Development Program)

Jul 2025 – Oct 2025

- **Product Discovery:** Led discovery across Ops, Planning, and Finance teams and defined the product vision for automated dispatching workflows, maximizing ecosystem capacity and resource throughput by 15%.
- **AI Product Ownership:** Orchestrated the product lifecycle and shipped AI-driven invoice classification and damage attribution features with 90% accuracy; accelerating financial processing velocity by 5x.
- **End-to-End Process Automation:** Led a 0→1 enterprise initiative to digitize and automate the Repair & Maintenance org, spanning 20+ facilities - reducing friction in the maintenance lifecycle and improving time-to-value (TTV) by 70%.
- **Cross-Functional Execution:** Developed an automated service orchestration workflow enabling real-time coordination across drivers, facilities, and service vendors, increasing operational velocity by 50%.

Strategy& (PwC) - Strategy & Value Creation Group

Chicago, IL

Senior Consultant

Aug 2024 – Jul 2025

- **AI Productivity Productization:** Developed an AI-based internal ops toolkit by automating analytical workflows, accelerating organizational project delivery by 20% (saving \$2.5M/year) and improving time-to-insight.
- **Data Strategy & Transformation:** Designed go-forward technology platform integration frameworks for \$5B+ mergers, enhancing data observability and decision velocity for executives and enabling synergy (18%) capture.
- **Data-driven Decision Support:** Architected SQL-based performance dashboards and KPI frameworks to track utilization, service levels, and product support operations, influencing C-level decision-making on \$1B+ operational improvements.
- **Stakeholder Communication:** Developed data-backed business cases and executive presentations that secured client buy-in for \$750M+ in value creation initiatives successfully across several complex partnership ecosystems.

Relivable - B2C VR Technology Startup

Chicago, IL

Go-to-Market (GTM) & Product Strategy - Internship

Jan 2024 – Mar 2024

- **Strategy:** Crafted GTM strategy through market research & customer segmentation, driving successful product positioning.
- **Customer Journey Optimization:** Implemented CRM-driven lead tracking and contract automation based on user journey insights; boosted conversion by 50% and NPS by 30 points.
- **Revenue-Linked Product Execution:** Supported early product commercialization strategy, contributing to \$100K revenue generation within first 3 months of launch.

Mercedes Benz

Bengaluru, India

Product Manager, AI and Data Product Development

Jul 2017 – Jun 2022

- **Product Leadership:** Founded and scaled a greenfield AI Solutions division; grew product adoption by 400% across 70% of the organization, by aligning ML capabilities with high-value business needs.
- **Product Strategy:** Defined the vision, roadmap, and feature strategy for 7+ ML-based analytics webapps, by engaging 55+ stakeholders across engineering, finance, and IT teams and created dashboards for executive reporting.
- **User Research & Experimentation:** Drove continuous user-centric product iterations through 50+ user interviews and structured A/B testing, boosting WAU by 300% and improving NPS by 35 points within 2 months.
- **Process Automation:** Orchestrated the strategic adoption and integration of a low-code analytics platform, securing \$5M/year in operational efficiencies by driving higher decision-making agility.
- **Program Management:** Led customer experience improvement program across 10+ carlines to enhance long-term product quality and user trust by reducing customer complaints by 15% and warranty costs by 20%.
- **Process Improvement:** Led the migration of legacy engineering stacks to automation-enabled platforms and streamlined digital model preparation; reduced engineering overhead by 27% saving \$1.8M annually.

Education

Kellogg School of Management - Northwestern University

Evanston, IL

Master of Business Administration (MBA)

Aug 2022 – Jun 2024

- **Majors:** Strategy, Operations, Finance; Dean's List 2023.
- **Courses:** Product Management, Marketing Analytics, Data Analytics with LLM, Software Development.

Indian Institute of Technology (IIT)

Hyderabad, India

Integrated Master of Technology (M.Tech and B.Tech)

Aug 2012 – Jun 2017

- Full scholarship by the Ministry of Education, India; Teaching Assistant to 110 post-Graduate students.

Skills

Technical: SQL (Advanced), Excel, Python, PowerBI, Jira, Figma, Asana, Alteryx, Tableau, R, Dataiku.

Product: Product discovery & roadmapping, PRDs & prioritization, Data-driven decision-making, KPI ownership, AI and data-analytics products, Cross-functional leadership, Executive communication.

AI/Data: AI-powered products, Analytics platforms, LLM-based workflows.
